INVESTMENT OBJECTIVE & POLICY

The investment objective of the Fund is to achieve long term growth in capital and income by developing a portfolio of equities and equity related instruments issued by or in connection with high quality listed companies from around the world.

FUND COMMENTARY

The fundamental backdrop for the US economy remains constructive. Despite softness in the lower end of the consumer market, overall US consumption continues to grow above 6%. US Fixed Investment growth is accelerating and well above the long-term average. AI investment is providing a boost to tech-exposed economies both in the US and globally including those in Asia.

A key feature in the month was the outlook for interest rates. The dominant rates narrative centered on Fed Chair Kevin Warsh's debut Jackson Hole address which investors interpreted as hawkish. This drove markets to price a target rate hike as more likely than not.

Second-quarter S&P 500 earnings season was strong, with the aggregate revenue and reported earnings respectively growing +15% and +52% reflecting +3% and +27% upside surprises. Unrealised gains from equity investments have been a notable feature.

August marked a re-rating of enterprise software from an oversold position that was threatened by fears of AI disruption risks. Dispersion within the market remains high.

The best contributors to fund performance were Microsoft, Netflix and S&P Global. Microsoft continued to rally in the month following its strong performance in July on the back of solid results. The re-rating in enterprise software was supportive. Sentiment on Netflix improved from its lows as investors looked forward to a stronger content slate to drive engagement and subscriber numbers higher. S&P Global re-rated as a pure ratings and financial data business having exited the Mobility business. The company announced an expanded collaboration with Microsoft to integrate its AI-ready data and insights into Copilot, offering visibility into monetizing its data through AI distribution.

The largest detractors from performance have been Alphabet, Broadcom and Amazon. Leadership changes within Alphabet's AI division DeepMind presented an overhang. Broadcom was affected by the scale of its AI chip financing activities and news on Alphabet entering a custom chip supply agreement with Marvell. This raised questions on their historically dominant share of Alphabet's expanding custom chips business. Amazon was impacted by regulatory headlines including an FTC investigation into their advertising business.

FUND RATINGS¹

¹ Source & Copyright: Morningstar © 2026. All Rights Reserved. Ratings are collected on the first business day of the month. Morningstar Star Rating and Sustainability Rating as at 31/08/26. This information is proprietary to Morningstar and/or its content providers, may not be copied or distributed, and is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from its use. Star Ratings measures a fund's past performance compared to similar funds on a risk-adjusted basis and is based on the returns of each individual share class. Sustainability (Globe) Ratings measures how well the companies inside an investment fund manage environmental, social, and governance (ESG) risks compared to similar funds. This is based on the B share class for USD-denominated share classes and the D share class for GBP-denominated share classes. Sustainability provides the company-level ESG analysis used to calculate the Sustainability Rating. This fund does not have a sustainable objective.

OUTCOME OF FAIR VALUE ASSESSMENTS (2025)

Our assessment confirms:

- The Fund meets the needs of the target market.
- The intended distribution strategy remains appropriate.
- The Fund provides fair value to customers.

INVESTOR PROFILE

The Fund is appropriate for all investor types, including those with only a basic knowledge of funds, it is compatible with investors who do not need a capital guarantee (investors must be prepared to accept fluctuations in the value of capital, including the ability to bear 100% capital loss) and looking for capital growth. Due to the volatility of markets, investors should be willing to accept price fluctuations in exchange for the opportunity of potentially higher returns. This is a long term investment. Investors should have an investment time horizon of at least 5 years. The recommended holding period does not provide any guarantee that the objective will be achieved. This product is eligible for all distribution channels (e.g. investment advice, portfolio management, non-advised sales and pure execution services).

The fund is unlikely to be appropriate for those who:

- Are looking for full capital protection or full repayment of the amount invested, and those who want a guaranteed return
- Have no risk tolerance
- Who are unwilling to accept price fluctuations (volatility) in the value of the fund
- Do not intend to invest for the long term

RISK PROFILE

The Fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up. The Fund may enter into derivative agreements with counterparties, and consequently there is a risk that a counterparty may fail to meet its obligations. This may lead to delays in the Fund receiving amounts due to it, receiving less than is due or receiving nothing. As the Fund has exposure to overseas securities, movements in exchange rates may, when not hedged, cause the value of your investment to increase or decrease. The Fund invests in equity and equity related securities which are subject to various risks including fluctuations in market prices, adverse issuer or market information and the fact that equity and equity related securities are subordinate in the right of payment to other corporate securities, including debt securities. The value of equity securities varies with the performance of the respective issuers and movements in equity markets generally. As a result, the Fund may suffer losses if it invests in equity of issuers where performance falls below market expectations or if equity markets in general decline or the Fund has not hedged against such a general decline. The Fund may hold a relatively small number of stocks (approximately 20 to 30 positions) as compared to many other funds. This may make the Fund's performance more volatile than would be the case if it had a more diversified investment portfolio. For full details of the Fund's risks, please see the prospectus and supplement sections entitled 'Risk Factors'.
